

## Adjustable Locking Chairs

Adjustable locking chairs have independently moving parts that can be locked in any position by the user. Pros and cons are the positive and negative comments received about each piece of equipment. The chair rating includes the following criteria: Adjustability, how adjustable is the chair do the pieces adjust independently, Support, does the chair provide adequate support to hold the user at the workstation, Comfort, is the chair comfortable to sit in, and Ease of adjustment, how easy is it to adjust the chair to the needs of the user.

Photo	Manufacturer	Description	Estimate Price
	<b>OFFICE MASTER</b> PT74	<b>Office Master Paramount Value Line Low Back Managerial Chair</b> Features: Pneumatic lift • Tilting backrest • EZ back height adjustment • Rocking tilt • Seat tilting • Sliding seat • Forward tilting • Adjustable lumbar • Tension knob - <b>Dimensions: Back: 17"W x 18"H, Seat: 20"W x 18"-20.5"D</b> - <b>Seat Height: 17"-22"</b> Can add a taller cylinder to accommodate taller seat heights Delivery: 1-2 weeks	\$304.20

**Pros:** The PT 74 is a good value chair with great adjustability. Each adjustment is controlled by a separate paddle. It can be fitted with arm rests if needed.

**Cons:** The tilt lock lever is unmarked and users often do not know what it does or how to unlock it.

## Mesh Chairs

Mesh chairs have a fabric mesh support system rather than a solid padded fabric.

	<p><b>Herman Miller</b></p>	<p><b>Herman Miller Aeron Chair</b>                      Features: lumbar support, graphite frame, classic pellicle fabric, carbon color. High back. All chair sizes have a high and wide contoured back that takes weight off the lower spine.</p>	<p>\$900.00</p>
---	-----------------------------	---	-----------------

**Pros:** Neat looking chair. The mesh allow for greater air circulation around the user and may be cooler than the traditional foam chair.

**Cons:** The chair is constructed in one piece so if the seat pan tilts forward the back rest does too, often pushing the user too far forward. The mesh is often too soft to provide enough support for the user. The back rest slides along rails that follow the curve of the back rest which often will not support the user. The controls are confusing and difficult to understand.

## Arm Rests

Arm Rests attach to the sides of the chair or the desk and provide arm support for the user. Many chairs have the arm rest built into the chair. The listed arm rests are separate from the chair. The arm rest rating includes the following criteria: Adjustability, can the arm rest be raised and lowered to a comfortable height and width for the user, comfort, is the support the right firmness and ease of adjustment, how easy is it to adjust the position of the arm rest.

	<b>OFFICE MASTER</b> KR-25	<b>Office Master Height Adjustable T Arms</b> - Natural grip control - <b>Height Range: 2.75"</b>  Delivery: 1-2 weeks	\$46.31
---	-------------------------------	--	---------

**Pros:** Can easily attach to Office Master chairs. Width and height adjustments.

**Cons:** May not be lowered enough to allow free arm movement. Can only be moved in to the edge of the chair, which may force some users to reach out for the arm rest.

The rating includes the following criteria: Thickness, is the mat thick enough to support the chair, Durability, how long does it last and Traction, how well does the mat hold its position on the floor.</p>			
	<b>UNIVERSAL</b>	Cleated chairmat for low to medium pile carpet 36" x 48" includes lip of 19" x 10"	\$32.20
	<b>UNIVERSAL</b>	Cleated chairmat for low to medium pile carpet 45" X 53" includes lip of 25" x 12"	\$33.66
	<b>UNIVERSAL</b>	Cleated chairmat for low to medium pile carpet 46" X 60" includes lip of 25" X 12"	\$55.78
<p><b>Pros:</b> Allows easier movement within the work station.</p>			
<p><b>Cons:</b> May be too thin to support the weight of the chair actually making it more difficult to move in the workstation. The floor mat may increase the risk of slips, trips and slides due to decreased rolling friction of the chair on the floor.</p>

## Keyboard Trays - Arms

Keyboard arms attach to the desk and support the keyboard platform. The arm provides the the height and tilt adjustments. The arm also allows the tray to retract and swivel under the desk. The rating icludes the following criteria: Adjustability, can the arm movee up and down, tilt, retract an swivel, Ease of adjustment, how easy is it to position and move the keybaord platform and Ease of installation, how difficult is it to put the keyboard arm in place.

	<b>WORKRITE</b> 2170-17TG	<b>WorkRite Pinnacle Adjustable Keyboard Arm 17"</b> - Features: Lift-N-Lock height adjustment, Thin-Glide ball bearing track, 360° swivel - Height Range: flush to 6" below the worksurface, Tilt Range: -15° to +10°	\$133.00
---	------------------------------	--	----------

**Pros:** Easily adjustable. Low profile helps to decrease the risk of the user hitting their knees on the mechanism.

**Cons:** The tilt control knob is oten confused as the height adjustment. The shorter track may not allow for full retraction of the tray.

### Ratings

## Keyboards- Standard

Keyboards are primary input devices for the computer. Keyboards come in different shapes and sizes to fit the needs of the user. Standard keyboards have a rectangular footprint. Split key keyboards have keys that are of various widths. Some split key keyboards can be adjusted in both width and position to meet the needs of the user. The rating includes the following criteria: Key action, how easy do the keys move and is the action smooth and Comfortable key size, are the keys a comfortable size to use easily.

	<p><b>CCS</b> 30210</p>	<p><b>Compucessory Keyboard</b>, Equipped With Windows 95, 18 1/2"W x 7 1/12" D x 1 3/8" H</p>	<p>\$28.50</p>
---	-----------------------------	--	----------------

**Pros:** Standard keyboard is used with most computers and is familiar to most users.

**Cons:** May be too small for some users.

### Ratings
